

Info Where You Go--Internet of Things, Without The Internet!

How to create a SD Card for this project.

1. Visit <http://www.raspberrypi.org/downloads/>
2. Download Raspbian Image. We used the February 2015 Version.
3. Visit <http://www.raspberrypi.org/documentation/installation/installing-images/>
4. Follow instructions for burning SD card.
5. When complete, install on Raspberry PI and boot PI.
6. edit /boot/config.txt
add the following line to the bottom:
dtoverlay=w1-gpio,gpiopin=4
7. edit /etc/rc.local
add:
/home/pi/optimized-SMS-Pi/startup.sh &
8. cd /home pi
9. git clone git://coapy.git.sourceforge.net/gitroot/coapy/coapy
10. cd coapy
11. python setup.py install
12. cd /home/pi
13. git clone <https://github.com/optimizedsms/optimized-SMS-Pi.git>
14. reboot
15. The software should start automatically.
